ANTIFOAM JET CONC is a textile use, water dilutable defoamer. It is specially compounded to be stable under wide ranged of pH in the textile dyeing and finishing industry, as well as effective under *high temperature* conditions above 95°C for a complete processing cycle.

ANTIFOAM JET CONC is a water-based product, containing silicones.

PHYSICAL PROPERTIES:

Appearance : Milky white viscous solution
Odour : Slight
Diluent : Water
pH of 1g/L solution : 7.0 ± 0.5
S.G. : 1.05 ± 0.05

USER'S RECOMMENDATION:

ANTIFOAM JET CONC is suitable for use in the jigger, winches, continuous range and other types of dyeing machine. Depending on the foaming conditions, normal application dosage is between 0.01g/L to 0.1g/L of **ANTIFOAM JET CONC**.

PACKING:

120kg HDPE drums / 190kg in steel drum / 1000kg tote

STORAGE:

To ensure prolong shelf life of product, it is advisable to store product under shade at all time, instead of exposing it to direct sunlight. Keep lid tight when not in use to prevent possible contamination to the product.

Stir well before use.

TRANSPORT:

Product is water-based, non-flammable and non-hazardous for transportation.

Separate MSDS available upon request
