ANTISTAIN RX600 has been developed specifically for the application in the garment and textile wet processing industries. It is formulated with high active non-ionic surface active dispersions to contain backstaining of indigo dyes onto cotton, polyester, synthetic fibres, labels and other materials during wet treatment processes.

ANTISTAIN RX600 enhances abrasion levels in the denim fabrics during the cellulase treatments as well as the evenness of abrasion patterns onto garments..

ANTISTAIN RX600 comes in translucent thick solution which can be diluted in any proportion of treated warm water with slight agitation.

It is conforming to Ecotex 100 when used as directed. **ANTISTAIN RX600** does not contain NP, APEO and banned amines.

PHYSICAL PROPERTIES:-

Appearance : Viscous translucent / opaque solution
Ionic Nature : Non - ionic
pH (1g/L) : 6.5 ± 1.0
Effective temp range : 20°C to 100°C

USERS' RECOMMENDATION:-

Textile mills:

For: Scouring : use 0.2 to 0.5g/L
Bleaching : up to 0.5g/L
Soaping : 0.2 to 0.5g/L

Industrial laundry:

For: Desizing : 0.2 to 0.5g/L
Stone wash : 0.5 to 1.0g/L
Enzyme wash : 0.5 to 1.5g/L

Note: When use on jeans / denim processing, the recommended processing temperatures of **ANTISTAIN RX600** should not exceed 60°C as wet processing of indigo denims above this temperature would cause more indigo dyes to be released from the denim fabrics and resulted in more cross staining of indigo dye onto the materials.

PACKINGS:

120Kg HDPE open top drum.

STORAGE:

Store in a cool and dry place. Keep lid tight when not in use.

TRANSPORT:

ANTISTAIN RX600 is a dispersed water-based product. It is non flammable, non-hazardous for transportation.
