CREASEOUT CONC is a specially developed non-yellowing, non-spotting, water based compounded fabrics lubricant intended for use in the textile wet processing and dyeing industries. It is applicable in scouring, desizing, dyeing, cellulase treatment (bio-polishing), processing of polyester, blends, cellulose, dye stripping and other textile wet processing treatments, under atmospheric temperatures (below 100°C).

The product contains non-ionic, polymeric compounds that work to smoothen frictions caused by fabric to fabric / fabric to machine movement during the wet treatment processes. Addition of **CREASEOUT CONC** will reduce the risks of incurring streakiness, fabric entanglements, over abrasions to fabrics / garments, pillings, and excessive loss of fabrics tear strength, seam slippages during the wet processes.

CREASEOUT CONC acts as a superior lubricant for the textile materials, as well as a premium softener for the dyeing of all fabric types; T/C, cotton or 100% Polyester under high temperatures and wide pH range. **CREASEOUT CONC** is a water based product and contain no known hazardous chemicals. It does not contain formaldehyde or any banned amines.

PHYSICAL PROPERTIES:

Appearance	: Light yellowish prills
pH(1g/L)	: 5.5 ± 1.0
Optimal dose-in Temperature	: Ambient condition
Compatibility	: Product is compatible with most textile auxiliaries and dyes (prior lab testings needed).
Odour	: Negligible
Diluent	: Suitably treated soft water.

USER'S RECOMMENDATION:

CREASEOUT CONC has to be added to the liquor prior to introducing fabrics or garments into machines in order to maximize its performance.

Dosage: 0.5 – 1.0g/L, Liquor ratio of 1:10.

PACKING	: 120kg HDPE open top drum
STORAGE	: Store in a cool and dry place. Keep lid tight when not in use.
TRANSPORT	: CREASEOUT CONC is a water based product. It is non flammable. Non-hazardous for transportation.

Separate MSDS is available upon request
