PIMAZE HT CONC

PIMAZE HT CONC

PIMAZE HT CONC is a concentrated thermal stable liquid alpha amylase enzymatic product developed specifically for use in warm to hot liquor desizing of textiles, fabrics and garments.

Treated goods will yield softer handle, excellent wettability, better dyeability, overall less susceptible to problems that would otherwise surface during fabric / garment after processing.

The use of this product does not affect the quality of treated goods although a slight loss in weight of the treated goods is expected due to removal of sizes from the treated fibres.

PIMAZE HT CONC is a water-based product. It is non-flammable, and not a marine pollutant.

Operational pH	: 5 to 8
Optimal operational pH	: 6.5 to 7.5
Operational temperatures	: 40°C to 95°C
Optimal operational temperature	: 80°C to 85°C

The Advantages of **PIMAZE HT CONC**:-

- User friendly, readily soluble in water
- Compatible with most desizing procedures applied in the textile industry
- Compatible with most non-ionic surfactants for desizing
- Good storage stability at below 40°C
- Easy handling
- Economical in costs
- Long storage stability of more than 9 months
- Active at high temperature
- Tolerate short timed live steam

It is recommended to dilute **PIMAZE HT CONC** up to at least 10 to 15 times with clean water before using.

PIMAZE HT CONC

DILUTION METHOD:

Bactericides : 0.1% to 0.3%
Clean water with salt (10%-20%) : 80% to 95%
Add between 6.5% to 10% of **PIMAZE HT CONC** to clean salt water solution with slight and short stirring.

USERS' RECOMMENDATIONS:

Desizing of Fabrics:

Diluted **PIMAZE HT CONC** : 1-4g/L
Wetting Agent : 1-2g/L
Detergent : 1-2g/L
Wet pick up : 70% - 100%
90°C to 110°C for about 20min.

PACKINGS:

30Kg Jerry Can

STORAGE:

Store in a cool and dry place. Avoid direct sunlight and heat.

TRANSPORT:

Product is non-flammable, and not a marine pollutant.

Separate MSDS is available upon request
